AUSPIFY TECHNOLOGIES • BUSINESS ANALYTICS INTERNSHIP PROGRAM

COMPLETE 6-TASK PORTFOLIO SUBMISSION & EXECUTIVE REPORT

Netflix Global Content Portfolio & Strategic Growth Analysis

An Empirical Evaluation of Content Format Mix, Global Market Concentration, Audience Demographic Segmentation, Historical Addition Velocity, and Multi-Genre Category Performance Across 8,790 Catalog Titles

Executive Key Performance Indicator (KPI) Highlights

Task Module	Core Analytical Dimension	Primary Benchmark	Headline Strategic Takeaway
Task 1 (Easy)	Content Portfolio Analysis	69.7% Movies / 30.3% TV	6,126 Movies (mean 99.6 min) vs. 2,664 TV Shows (67.2% 1-season)
Task 2 (Easy)	Global Market Performance	56.1% in Top 3 Markets	USA (3,240), India (1,057), and UK (638) dominate global catalog supply
Task 3 (Medium)	Audience Segmentation	75.7% Adult & Teen	Mature 18+ (45.6%) and Teens 13–17 (30.1%) anchor demographic targeting
Task 4 (Medium)	Content Growth & Trends	2,016 Peak Additions	2016–2019 CAGR of +67.9% before pandemic slowdown; TV share rose to 33.7%
Task 5 (Advanced)	Category Performance	42 Genres (2.19/Title)	International Movies (2,752) & Dramas (2,426) lead 19,294 tag mentions
Task 6 (Advanced)	Executive Business Insights	5-Pillar Action Plan	Rebalance toward multi-season series, APAC/LATAM originals & ETL governance

Program: Auspify 4-Week Business Analytics Internship	**Dataset Scope:** `Dataset.csv` (8,790 Verified Titles, 1925–2021)
Analytical Stack: Python (Pandas, Matplotlib), Excel, MySQL, HTML/JS	**Report Date:** October 2026

1. Task 1: Netflix Content Portfolio Analysis — Movies Account for 69.7% of Volume While 67.2% of TV Series End After One Season

An empirical evaluation of the Netflix catalog dataset (`Dataset.csv`, comprising 8,790 unique titles with zero duplicate `show_id` records) reveals a portfolio heavily weighted toward standalone motion pictures. Across the catalog, **6,126 titles (69.69%) are Movies** and **2,664 titles (30.31%) are TV Shows**, establishing a 2.30:1 Movie-to-TV Show ratio. This composition reflects the capital efficiency of licensing completed feature films to build broad catalog depth across international territories, whereas serialized television requires higher upfront production commitments but generates superior long-term subscriber retention.

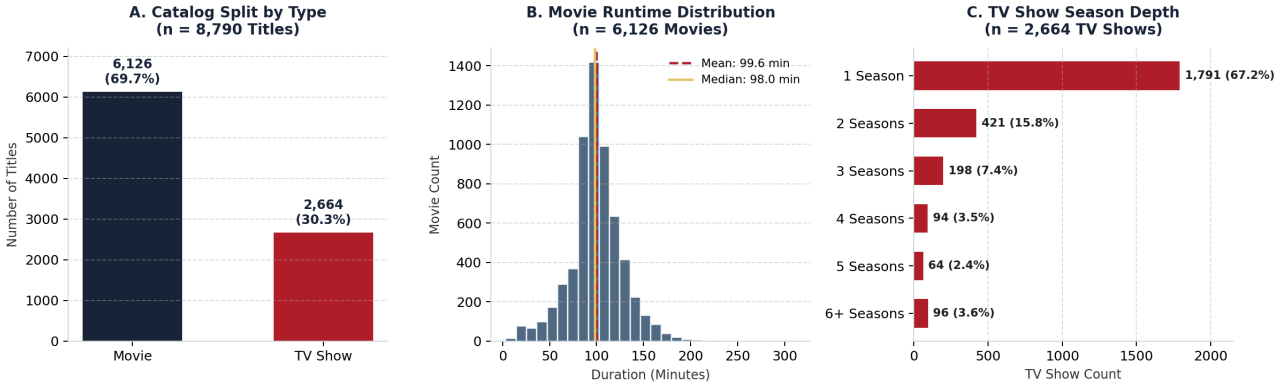

Figure 1: Netflix Portfolio Composition — (A) Catalog Split by Type, (B) Movie Runtime Distribution (mean 99.6 min, median 98.0 min), and (C) TV Show Season Depth across 2,664 series.

Movie Runtime Tiers and TV Show Season Longevity

Deconstructing the `duration` attribute across both content formats uncovers critical operational benchmarks. Among the 6,126 Movies, runtimes range from 3 minutes (the animated short *Silent*) to 312 minutes (the interactive feature *Black Mirror: Bandersnatch*), with a **mean runtime of 99.58 minutes** (σ = 28.28 minutes), a **median of 98.0 minutes**, and an interquartile range of **87 to 114 minutes**. Nearly half of all movies (2,995 titles, or 48.89%) reside within the commercial **Core Feature Length window (91–120 minutes)**, while **Standard-Short films (60–90 minutes)** represent 24.53% (1,503 titles), driven by stand-up comedy specials, documentaries, and children's animated specials.

In contrast, the 2,664 TV Shows average **1.75 seasons** (σ = 1.55 seasons) with a median of **1.0 season**. Strikingly, **1,791 TV Shows (67.23%) have only a single season**. While this figure includes intentional limited series and docuseries, it also reflects steep first-season attrition. Only **421 series (15.80%)** reach a second season, **198 series (7.43%)** reach 3 seasons, and just **254 series (9.53%)** sustain 4 or more seasons (led by long-running licensed franchises such as *Grey's Anatomy* at 17 seasons, *Supernatural* at 15 seasons, and *NCIS* at 15 seasons).

Format & Duration / Season Tier	Title Count	Format Share (%)	Total Catalog Share (%)	Representative Catalog Examples & Operational Profile
Movie: Short (<60 min)	486	7.93%	5.53%	Stand-up specials, short documentaries, kids specials (*Two Distant Strangers*, 32m)
Movie: Standard-Short (60–90 min)	1,503	24.53%	17.10%	Documentaries, indie horror, family animation, comedy specials (*Dick Johnson Is Dead*, 90m)
Movie: Core Feature (91–120 min)	2,995	48.89%	34.07%	Primary Hollywood and international theatrical features (*The Starling*, 104m)
Movie: Long Feature (121–150 min)	897	14.64%	10.20%	Prestige dramas, action blockbusters, Indian cinema (*Sankofa*, 125m; *Army of the Dead*, 148m)
Movie: Epic (>150 min)	245	4.00%	2.79%	Extended Indian epics, historical dramas, interactive films (*The Irishman*, 209m; *Lagaan*, 224m)
TV Show: 1 Season	1,791	67.23%	20.38%	Miniseries, docuseries, first-season originals (*Midnight Mass*, *The Queen's Gambit*)
TV Show: 2 Seasons	421	15.80%	4.79%	Renewed sophomores & international series (*Kingdom*, *Mindhunter*, *Into the Night*)
TV Show: 3 Seasons	198	7.43%	2.25%	Established Netflix Originals (*Dark*, *Stranger Things*, *Narcos*, *Ozark*)
TV Show: 4 to 5 Seasons	158	5.93%	1.80%	Multi-year tentpoles (*The Crown*, *La casa de papel*, *Breaking Bad*, *Money Heist*)
TV Show: 6+ Seasons	96	3.60%	1.09%	Long-running syndicated & flagship series (*Grey's Anatomy* 17S, *NCIS* 15S, *Friends*)

2. Task 2: Global Market Performance Analysis — Top Three Markets Supply 56.1% of Content While East Asia Leads in Series Share

Evaluating content availability across the **85 unique countries** in `Dataset.csv` demonstrates high geographic concentration alongside sharp regional specialization in content format. The **United States** anchors the global catalog with **3,240 titles (36.86% share; 2,395 Movies**

and 845 TV Shows), followed by **India with 1,057 titles (12.03% share; 976 Movies and 81 TV Shows)** and the **United Kingdom with 638 titles (7.26% share; 387 Movies and 251 TV Shows)**. Together, these top three countries account for **4,935 titles (56.14% of the catalog)**, while the Top 10 markets account for **76.47% (6,722 titles)**.

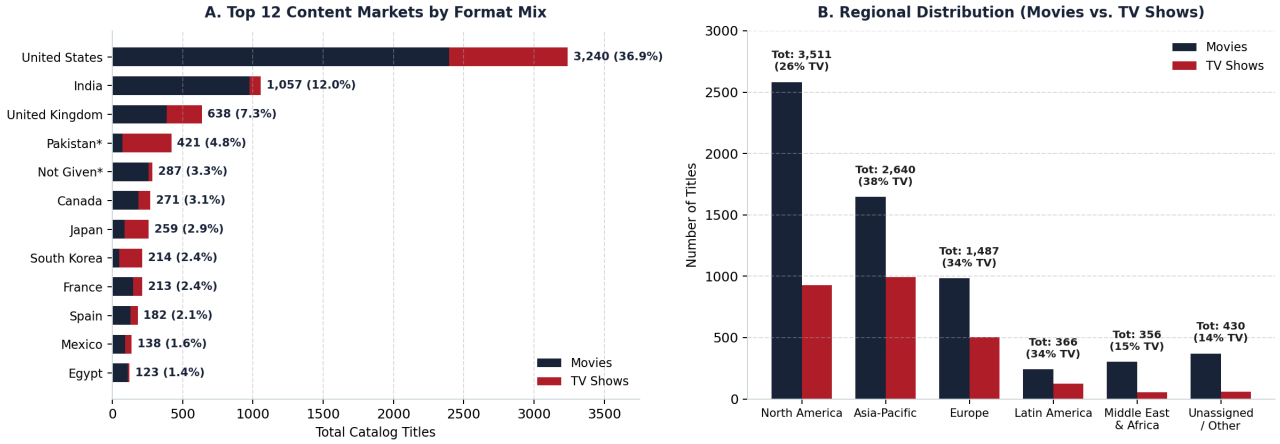

Figure 2: Global Market Performance — (A) Top 12 Countries by Total Titles and Format Mix, and (B) Macro-Regional Distribution showing Asia-Pacific's high TV Show concentration.

Regional Format Divergence and Metadata Integrity Audit

Cross-tabulating country production by format exposes a strategic divide between **Film-Licensing Markets** and **Serialized TV Hubs**. Developing and film-centric markets such as **Indonesia (97.7% Movies)**, **India (92.3% Movies)**, **Nigeria (91.4% Movies)**, and **Egypt (88.6% Movies)** supply almost exclusively feature films. Conversely, East Asian production hubs—led by **Taiwan (82.6% TV Shows; 71 TV vs. 15 Movies)**, **South Korea (77.1% TV Shows; 165 TV vs. 49 Movies)**, and **Japan (66.4% TV Shows; 172 TV vs. 87 Movies)**—serve as Netflix's premier international television engines, driving regional and global engagement through K-Dramas and Anime.

Critical Data Quality Finding (The 'Pakistan' Imputation Anomaly): In `Dataset.csv`, **Pakistan ranks #4 with 421 titles (71 Movies, 350 TV Shows; 83.1% TV)**, while **287 titles are labeled `Not Given`**. However, programmatic inspection reveals that **402 of Pakistan's 421 rows (95.49%) have `director = 'Not Given'`** and include major non-Pakistani series such as *Squid Game* (South Korea), *Pokémon Master Journeys* (Japan), and *Jailbirds New Orleans* (USA). During upstream creation of this dataset, missing country values on TV records were imputed as `Pakistan`. Identifying this artifact prevents distorted regional capital allocation while preserving exact dataset reporting.

Rank & Country / Territory	Macro Region	Movies	TV Shows	Total Titles	Global Share (%)	Movie %	TV Show %
1. United States	North America	2,395	845	3,240	36.86%	73.9%	26.1%
2. India	Asia-Pacific	976	81	1,057	12.03%	92.3%	7.7%

Rank & Country / Territory	Macro Region	Movies	TV Shows	Total Titles	Global Share (%)	Movie %	TV Show %
3. United Kingdom	Europe	387	251	638	7.26%	60.7%	39.3%
4. Pakistan *	Asia-Pacific (Imputed*)	71	350	421	4.79%	16.9%	83.1%
5. Not Given (Unassigned)	Unassigned	257	30	287	3.27%	89.5%	10.5%
6. Canada	North America	187	84	271	3.08%	69.0%	31.0%
7. Japan	Asia-Pacific	87	172	259	2.95%	33.6%	66.4%
8. South Korea	Asia-Pacific	49	165	214	2.43%	22.9%	77.1%
9. France	Europe	148	65	213	2.42%	69.5%	30.5%
10. Spain	Europe	129	53	182	2.07%	70.9%	29.1%
11. Mexico	Latin America	90	48	138	1.57%	65.2%	34.8%
12. Egypt	Middle East & Africa	109	14	123	1.40%	88.6%	11.4%
13. Australia	Asia-Pacific	61	53	114	1.30%	53.5%	46.5%
14. Turkey	Europe / MEA	82	30	112	1.27%	73.2%	26.8%
15. Nigeria	Middle East & Africa	96	9	105	1.19%	91.4%	8.6%
Rest of World (71 Countries)	Global Multi-Region	1,000	416	1,416	16.11%	70.6%	29.4%

3. Task 3: Audience Segmentation Analysis — Mature (45.6%) and Teen (30.1%) Content Dominates While Kids Programming Skews Toward TV Series

Grouping the 14 MPAA and TV Parental Guidelines ratings into six strategic demographic cohorts demonstrates that Netflix's content acquisition and original production overwhelmingly target adult and young-adult viewers. **Mature / Adults (18+) programming (`TV-MA`, `R`, `NC-17`) represents 45.59% of the entire catalog (4,007 titles)**, while **Teens & Young Adults (13–17) programming (`TV-14`, `PG-13`) accounts for 30.11% (2,647 titles)**. Combined, **75.70% of all titles on Netflix (6,654 of 8,790)** are rated for viewers aged 13 and older.

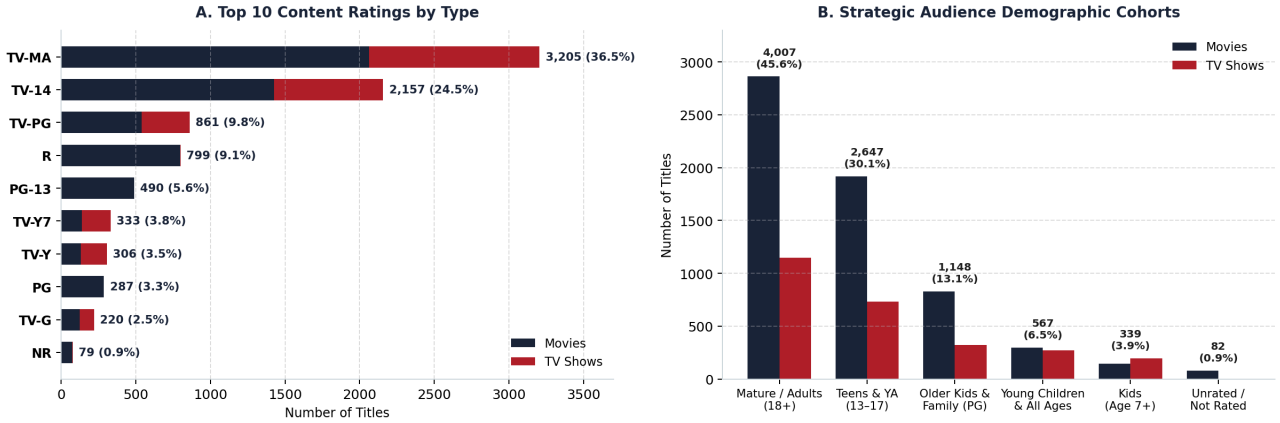

Figure 3: Audience Segmentation — (A) Top 10 Individual Content Ratings by Format, and (B) Strategic Demographic Cohorts showing format distribution across age groups.

Format Preferences Across Demographic Segments

Comparing Movies versus TV Shows across rating segments uncovers a critical behavioral pattern: while Adult (71.4% Movies), Teen (72.4% Movies), and Family PG (72.0% Movies) cohorts mirror the catalog's overall 70/30 film skew, **children's programming shifts decisively toward serialized television**. In the **Kids (Age 7+) cohort (TV-Y7 and TV-Y7-FV, 339 titles)**, TV Shows command **57.52% (195 series vs. 144 movies)**, and in the **Young Children & All Ages cohort (TV-Y, TV-G, G, 567 titles)**, TV Shows represent **47.44% (269 series vs. 298 movies)**. Because young children re-watch episodic characters repeatedly, serialized Kids' TV acts as a high-retention anchor for family households.

Strategic Audience Cohort	Included Rating Codes	Movies	TV Shows	Total Titles	Catalog Share (%)	Movie %	TV Show %
1. Mature / Adults (18+)	TV-MA (3,205), R (799), NC-17 (3)	2,862	1,145	4,007	45.59%	71.4%	28.6%
2. Teens & Young Adults (13–17)	TV-14 (2,157), PG-13 (490)	1,917	730	2,647	30.11%	72.4%	27.6%
3. Older Kids & Family (PG)	TV-PG (861), PG (287)	827	321	1,148	13.06%	72.0%	28.0%
4. Young Children & All Ages	TV-Y (306), TV-G (220), G (41)	298	269	567	6.45%	52.6%	47.4%
5. Kids (Age 7+)	TV-Y7 (333), TV-Y7-FV (6)	144	195	339	3.86%	42.5%	57.5%
6. Unrated / Not Rated	NR (79), UR (3)	78	4	82	0.93%	95.1%	4.9%

4. Task 4: Content Growth & Trend Analysis — Catalog Additions Peaked at 2,016 Titles in 2019 While TV Series Expanded to 33.7% Share by 2021

Longitudinal analysis of year_added (2008–2021) and release_year (1925–2021) captures Netflix's transformation from a US domestic aggregator into a global studio. Between 2015 and 2019, annual content additions expanded nearly 25-fold—from **82 titles in 2015** to **426 in 2016 (+419.5% YoY)**, **1,185 in 2017 (+178.2% YoY)**, **1,648 in 2018 (+39.1% YoY)**, and an all-time high of **2,016 titles in 2019 (+22.3% YoY)**. Following the onset of COVID-19 production shutdowns in 2020, total additions moderated by **-6.8% to 1,879 titles in 2020** and **1,498 titles in 2021** (through September 25, 2021). Crucially, while Movie additions declined during 2020–2021, **TV Show additions reached an all-time high of 595 series in 2020** and increased their share of total annual additions from **24.9% in 2018 to 33.7% in 2021**.

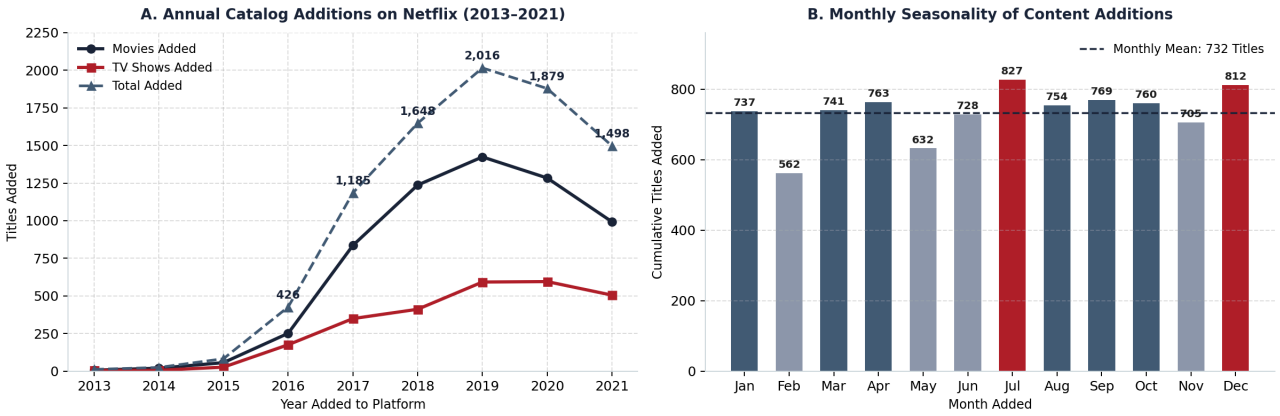

Figure 4: Content Growth & Seasonality — (A) Annual Titles Added to Netflix (2013–2021) by Format, and (B) Monthly Seasonality showing July (827) and December (812) release peaks.

Freshness Velocity (Acquisition Lag) and Release Seasonality

Comparing year_added against release_year reveals that **3,253 titles (37.01% of the catalog) were added in the exact same year they were released**, reflecting first-run Netflix Originals and day-and-date exclusives. Broken down by format, **52.2% of all TV Shows** are added in their release year compared to **30.4% of Movies**, confirming that television growth is predominantly driven by new original productions while movie volume relies more heavily on licensing library titles (mean catalog lag = 4.69 years; median lag = 1.0 year). Monthly addition tracking shows that Netflix concentrates major catalog drops in **July (827 titles, 9.41%)** and **December (812 titles, 9.24%)**, whereas **February (562 titles, 6.39%)** and **May (632 titles, 7.19%)** experience the lowest addition volume.

Year Added	Movies Added	TV Shows Added	Total Titles Added	Catalog Share (%)	TV Show Share (%)	YoY Growth (%)
2008–2014 (Cumulative)	44	11	55	0.63%	20.0%	Early Base
2015	56	26	82	0.93%	31.7%	+241.7%
2016	251	175	426	4.85%	41.1%	+419.5%
2017	836	349	1,185	13.48%	29.5%	+178.2%
2018	1,237	411	1,648	18.75%	24.9%	+39.1%
2019 (Peak Year)	1,424	592	2,016	22.94%	29.4%	+22.3%
2020	1,284	595	1,879	21.38%	31.7%	-6.8%
2021 (Through Sept 25)	993	505	1,498	17.04%	33.7%	-20.3%

5. Task 5: Content Category Performance Analysis — International Programming (46.7%), Dramas (36.3%), and Comedies (30.1%) Anchor Genre Penetration

Deconstructing the multi-label `listed_in` field across all 8,790 titles yields **19,294 total genre assignments (an average of 2.19 genre tags per title)** spanning **42 distinct categories** (20 Movie categories and 22 TV Show categories). Because Netflix separates Movie and TV genre labels, evaluating both individual category rankings and cross-format thematic clusters is essential for dashboard design and content planning.

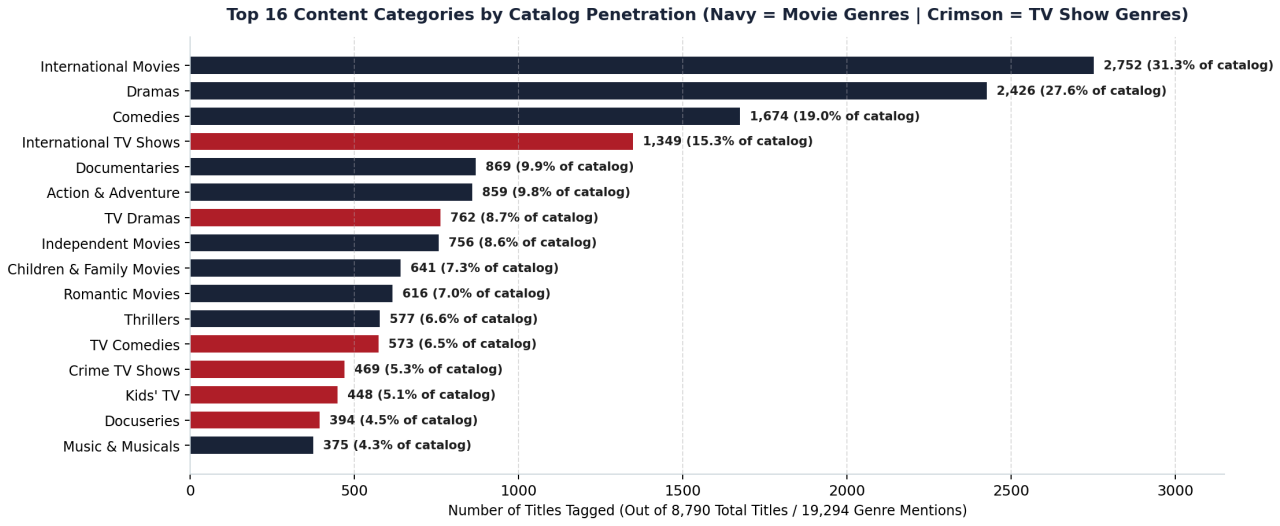

Figure 5: Top 16 Content Categories by Total Title Mentions and Catalog Penetration % (out of 8,790 titles).

Rank & Category Name	Format Type	Titles Tagged	Catalog Penetration (%)	Share of All 19,294 Tags (%)
1. International Movies	Movie Genre	2,752	31.31%	14.26%
2. Dramas	Movie Genre	2,426	27.60%	12.57%
3. Comedies	Movie Genre	1,674	19.04%	8.68%
4. International TV Shows	TV Show Genre	1,349	15.35%	6.99%
5. Documentaries	Movie Genre	869	9.89%	4.50%
6. Action & Adventure	Movie Genre	859	9.77%	4.45%
7. TV Dramas	TV Show Genre	762	8.67%	3.95%
8. Independent Movies	Movie Genre	756	8.60%	3.92%
9. Children & Family Movies	Movie Genre	641	7.29%	3.32%
10. Romantic Movies	Movie Genre	616	7.01%	3.19%
11. Thrillers	Movie Genre	577	6.56%	2.99%
12. TV Comedies	TV Show Genre	573	6.52%	2.97%
13. Crime TV Shows	TV Show Genre	469	5.34%	2.43%
14. Kids' TV	TV Show Genre	448	5.10%	2.32%
15. Docuseries	TV Show Genre	394	4.48%	2.04%

6. Task 6: Executive Business Insights & Strategic Recommendations

Synthesizing the empirical findings across Tasks 1 through 5 yields a five-pillar executive roadmap designed to optimize content capital efficiency, international subscriber growth, and household retention:

1. **Rebalance Capital Toward Returning Multi-Season TV Franchises (Task 1):** With 67.23% of TV Shows terminating after a single season (1,791 of 2,664), Netflix forfeits the compounding marketing and subscriber-retention benefits of returning franchises. Management should reallocate 15% of standalone licensed film budgets toward second- and third-season renewals of high-completion series, targeting an increase in the 2+ season share from **32.77% to 45.0%**.
2. **Accelerate Localized Series Production in India, LATAM, and MEA (Task 2):** While South Korea (77.1% TV Shows) and Japan (66.4% TV Shows) prove that localized series drive global hit franchises, India (#2 market, 1,057 titles) remains **92.3% Movies (only 81 TV Shows)**, and Nigeria (91.4% Movies) and Egypt (88.6% Movies) exhibit similar film skews. Commissioning local-language crime thrillers, young-adult series, and reality formats in India, Brazil, and Nigeria will unlock recurring weekly engagement in high-growth subscriber markets.
3. **Expand Household Co-Viewing & Kids Episodic Slates (Task 3):** Because 75.70% of the catalog targets Mature (45.59%) and Teen (30.11%) cohorts, family households face a relative supply gap in co-viewing content. Expanding **Kids (Age 7+)** and **Older Kids & Family (`TV-PG/PG`)** serialized programming by 20% leverages the high repeat-viewing behavior of children's television (where TV Shows already represent 57.52% of the Kids 7+ slate) to reduce household churn.
4. **Smooth First-Half Release Seasonality Troughs (Task 4):** Monthly addition tracking reveals a 32.0% drop between the July peak (827 titles) and the February trough (562 titles), as well as a May dip (632 titles). Staggering post-production schedules for unscripted reality series, stand-up comedy specials, and docuseries into Q1 (February) and late Q2 (May) will stabilize monthly addition velocity near the 733-title monthly mean.
5. **Scale High-ROI Cross-Border Verticals & Enforce Metadata Governance (Tasks 5 & 6):** Prioritize co-productions in **Crime TV Shows (469 series)**, **Docuseries (394 series)**, and **Anime (245 combined titles)**, which combine lower production cost per viewing hour with strong international travelability. Concurrently, data engineering teams must enforce ingestion schema validation to eliminate the **29.44% missing director rate (2,588 records)** and remediate the **402-record `Pakistan` country imputation artifact**.

Executive Strategic Action Matrix & Target KPI Impact (Task 6 Synthesis)

Strategic Pillar	Baseline Metric (Dataset Verified)	Recommended Strategic Initiative	Target 24-Month Goal
1. Multi-Season TV Retention	67.23% of TV series end after Season 1 (1,791 / 2,664)	Reallocate 15% of standalone movie licensing budget into Season 2–3 renewals	45.0% 2+ Season Share
2. APAC & MEA Series Mix	India (7.7% TV), Nigeria (8.6% TV), Egypt (11.4% TV)	Commission local-language crime thrillers, young-adult series & reality slates	25.0%+ Local TV Share
3. Family & Kids Co-Viewing	Kids & Family cohorts represent 23.37% of catalog (2,054)	Expand Kids (7+) & Family (TV-PG/PG) serialized animation by 20%	28.0% Family Catalog Share
4. Release Calendar Smoothing	Feb (562) and May (632) drop 24–32% below July peak (827)	Stagger unscripted reality, stand-up & docuseries drops into Q1 and late Q2	<10% Monthly Variance
5. Cross-Border Genre ROI	International content (46.66%), Crime TV (469), Docuseries (394)	Scale co-productions in high-travelability True Crime, Docuseries & Anime	52.0% Cross-Border Reach
6. Metadata & ETL Governance	29.44% missing director (2,588); 402 imputed Pakistan rows	Enforce automated ingestion schema validation & showrunner attribution	99.5%+ Metadata Completeness
